

EXPRESS / ADVANCED SOFTWARE

Cansec's First Access® software provides a powerful yet easy to use platform to manage the new MAP access control panels. It is available in two versions: Express for basic access control functions and Advanced for more sophisticated applications. Both support up to 1,024 readers. To facilitate deployment, First Access software automatically scans the local network and finds all connected MAP controllers. No need to assign each panel a static IP address. Operators can quickly and easily void and validate credentials and edit Unlock Schedules, Holiday Schedules and Access Profiles. All programming changes and commands are instantly transmitted to all MAP controllers. Everything required to make GO/NO-GO decisions is stored at the controller, guaranteeing a fast and consistent response regardless of the system size, network speed or server load. Up to 10K events are buffered at the controller and transferred to the host, ensuring that no transactions are lost.

FEATURES & COMPARISON

	EXPRESS SOFTWARE	ADVANCED SOFTWARE
Cardholder/user capacity	5,000	100,000
Reader capacity	Up to 1024	Up to 1024
First Access clients	2	10
Automatically finds MAP controllers	Yes	Yes
Up to 5 credentials per user	Yes	Yes
Real time TCP/IP based communications	Yes	Yes
Programmable access profiles and holidays	Yes	Yes
Entry & Exit reader per door	Yes	Yes
Automatic door unlock schedules	Yes	Yes
Alarms for forced entry/door held open conditions	Yes	Yes
Double-swipe privilege per user per door	Yes	Yes
Double-swipe as trigger	No	Yes
Uses Microsoft SQL database	Yes	Yes
Card + Pin	Yes	Yes
Elevator control	Yes	Yes
Door interlock	No	Yes
Card groups & reader groups	No	Yes
Auxiliary input/output points	No	Yes
Timed anti-passback	No	Yes
Local anti-passback	No	Yes
Scheduled commands & triggers	No	Yes
Email notifications/alarms	No	Yes
First Card In – Card Group	No	Yes
Software key required	No (Free)	Yes
Asure ID photo badging integration (Option)*	Yes	Yes
* Uses 1 First Access client connection	(1 First Access clients left)	(9 First Access clients left)
NVR support for Uniview (Option)	Yes	Yes
Partition (Option)	No	Yes

PART NUMBERS & ADDITIONAL OPTIONS

CA-FAEXP First Access® Express software (Free)

CA-FAADV First Access® Advanced software (Software key required)

CA-FAAPB Integrated photo badging with Asure ID software (Software key required)

CA-UNISW NVR integration software for Uniview (Software key required)

CA-FAAPT First Access® Advanced Partitioning software (Software key required)
